WORK EXPERIENCE

Research Assistant January 2020 – February 2021
International Institute of Tropical Agriculture (IITA). Ibadan, Nigeria.

- Identified different types of nematodes and their eggs under a microscope while separating Root-knot nematodes.
- Inoculated Root-Knot Nematodes on cucumber plants (*Cucumis sativus*) and tomato plants (*Solanum lycopersicum*).
- Created sustainable crop pest management by investigating the In-vitro test of the aqueous leaves extracts of some botanicals to evaluate their effect on RKNs eggs hatchability and juvenile mortality before applying it in the field.

- Organized knowledge-sharing sessions to educate my colleagues on ways to identify and count root-knot nematodes under the compound and stereomicroscope using a counting slide and, as a result, they were able to apply the knowledge practically without any further supervision.

Bancassurance Associate
